Subject: RE: question - toxicity data for 1,4-dioxane

Hi Shari,
Our current criterion (85ug/L) for 1,4-Dioxane is based on 10⁻⁵ risk.

Wally

Subject: FW: question - toxicity data for 1,4-dioxane

Wally,

I'm researching how the recent EPA changes in tox values for 1,4-dioxane affects the criteria were currently using for West KL (85 ug/L). Can you find out if the Part 201 DWC of 85 ug/L for 1,4-dioxane based on a 10⁻⁴ risk? Shari
